Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

R. Site2: DraIII (CACCATGIG)

R. Site2: DraIII (CACCATGIG)

Rescription: 1st strand cDNA was primed with an oligo(dT) primer [ATGIGGCTTTTTTTTTTTTTTT]; double-stranded cDNA was synthesized using specific 5' and 3' primers and amplified by PCR. The PCR product was digested with SfiI and size selection was performed to exclude fragments <1.5kb.The SfiI-digested PCR product was cloned into distinct DraIII sites of pMEI85-FL3. XhoI sites just outside the DraIII sites can be used to isolate the cDNA insert. Libraries

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The DNA was isolated by screening a human B cell cDNA library with mixed Drosophila DNA probes based on the conserved SET domains in E(z) and Su(var)3-9. The DNA, and its products, are useful in therapy (esp. gene therapy) and diagnosis of human diseases that involve deregulated chromatin-regulator genes having a SET domain, esp. cancer. (Updated on 25-MAR-2003 to correct PR field.)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              New DNA encoding chromatin regulator protein with SET domain related vectors, transformed cells, proteins and antibodies, diagnosis and treatment of cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Claim
